PROFILE

I have been working for many years in construction but recently chose to go to school for computer programming because it is my passion. I tinker with 3D game development in my free time, which eventually progressed to competing in game jams. Because of my previous experience in music and art, I participate as an audio engineer. I will also pivot and contribute to other art assets and coding if the necessity arises.

EDUCATION

Saskatchewan Polytechnic

September 2019- June 2021
